Intrauterine Device (IUD) Removal Consent

Name _____ Chart No. _____

I understand that I can become pregnant right after the IUD is taken out. If I do not want to get pregnant after the IUD is taken out, I can have a new IUD put in today or choose a different method of birth control to start today.

I understand that a clinician will insert a speculum into my vagina and grasp the strings with a device like tweezers. Then the IUD will be gently pulled out of my uterus. In most cases, the arms of the IUD will fold up, and the device will slide out. I may feel cramping for a minute as it comes out. If the IUD doesn't come out with a slight pull, I may have an ultrasound done or I may be referred to another provider who can do an ultrasound and remove the device using another method.

This form has been fully explained to me, I have read it or have had it read to me, and I understand its content. I have had the chance to ask questions. All of my questions and concerns have been answered.
